

Project Name: AI Task Manager Platform

Features:

- File upload and analysis
- Task extraction using AI
- GitHub integration
- Microsoft Teams notifications
- Real-time task updates

Modules:

- File Processing Module
- Task Extraction Engine
- GitHub Integration Module
- Notification Service
- Real-Time Event Listener

Tasks:

- Implement file upload API
- Parse PDF and extract structured data
- Build task extraction logic
- Integrate GitHub repository creation
- Create GitHub issues from tasks
- Implement Teams webhook integration
- Build event listener for GitHub webhooks
- Implement task status updates
- Add user authentication
- Optimize task grouping logic
